(LISTED BELOW)

SUPPLEMENT TO

1. On 4 and 5 October 1949, the Soviet authorities removed from private use the main communication cable FK-12 leading from Vienna to Bruck a.d. Leitha in Burgenland; the connecting lines of this cable were diverted to the Konservenfabrik in Bruck a.d. Leitha. Eight lines were removed from the cable FK-2 leading from Halbthurn to Bruck a.d. Leitha. The northern line of the long distance cable (Fernkabel) was disconnected near Wilfersdorf and 40 connecting lines removed from use. District cable 501 was completely disconnected.
2. It is not clear whether or not the removal of a relatively large number of communication lines by the Soviet authorities in the border zone between Czechoslovakia and Hungary indicates the establishment of a new Soviet headquarters in this section. As far as could be determined, there was no particular justification for these changes.
